Art Unit: 1653

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-3 and 12, drawn to a method of controlling granule secretion by regulating an active form of calgranulin, are classified in class 435, subclass 335 and 377.
- II. Claims 4-10 and 13-16, drawn to a method of detecting a substance that inhibits granule secretion, are classified in class 435, subclass 7.1, 7.21 and 7.24.
- III. Claim 11, drawn to a method of obtaining a substance for controlling intimal injury of blood vessel, is classified in class 514, subclass 2.

The inventions are distinct, each from the other because of the following reasons:

Invention I, II and III are directed to different and/or distinct methods of granule secretion regulation in cell and/or tissue and relative processes thereof, a method of using an active form of calgranulin protein to control granule secretion, a method of identifying a compound utilized in the granule secretion regulation, and a method of generating a compound utilized in treatment of an injury of blood vessel, respectively. These methods differ with respect to method steps, end-products, targets, and ingredients; therefore, each method is patentably distinct.

For the reasons above the inventions have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

A telephone call was made to Thomas W. Perkins on 18 June 2002 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the response to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed.

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a petition under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
